

Security level: recycle plus

Safe, cost-effective disposal
of your used paper.

Suitable for:

Commercially sensitive documents that contain intellectual property which you'd prefer people outside your organisation not to see.

Service Elements:

yoyo recycle plus is a safer way of disposing of your used office paper as all documents - confidential and non-confidential - are shredded before being sent for recycling.

yoyo recycle plus removes the need to separate confidential and non-confidential documents - saving your business time and money.

The identity of documents is protected with semi-opaque (recyclable) plastic sacks - allowing you to monitor waste quality without compromising security. The price of these is included in the complete collection and recycling service.

We collect all the used paper from your office. Then it's shredded before being sent to our recycling plant to create new paper - yoyo full circle, our 100% recycled paper.

Straightforward, clear disposal system for used paper via cardboard desk trays, floor bins and storeroom pallet boxes.

The floor bins have letterbox-sized openings to prevent casual observers from viewing documents.

To reduce the environmental impact of the process, used paper is collected at the same time that new paper is delivered.

All office paper (white paper, coloured paper, white envelopes,

magazines, brochures etc) can be recycled except: brown paper, brown envelopes, cardboard and newspapers.

Management information is provided to track office paper usage and disposal - how much paper is consumed, collected, recycled and reused as recycled office paper.

Documentation is provided to prove your Duty of Care (streaming your paper waste using our service allows you to fulfil your obligation to pre-treat your waste stream before any is sent to landfill, so you are complying with the Landfill Directive, effective from 30th October 2007).
